Product Description

A comfortable seat is essential if you spend a lot of time sitting at work. The Eiger office chair was developed to offer you the greatest possible comfort in combination with functionality. Worried that the chair won't fit under your desk? No problem, because the armrests, back height and seat height adjustment of the Eiger office chair can be adjusted as required.

In addition, the chair has an adjustable tilt mechanism, which allows you to adjust the mobility of your chair to your needs. Support the most important part of your body, namely your back, and prevent chronic complaints with the Eiger office chair. Thanks to the turnstile with five castors, the chair can also be moved very easily, so that you can move flexibly between your desk and cabinet when you work.

The height of the back of this chair is 60 cm and the width of the back is 47 cm. In addition, the chair has a seat depth of 46 cm and the width of the seat is 49 cm. The seat height is adjustable from 42 to 55 cm.

This chair has been tested for fire resistance to the following EU standards and the UK national standard: EN1021-1, EN1021-1, BS7176, BS5852.
