

# REY A4 Photocopy Paper 80gsm White

REY Copy is ideal for day-to-day print jobs in busy offices and at home. It provides the quality you need for productive, high-speed B&W printing. Its whiteness produces sharper text and contrast, reduces eyestrain, and improves readability. It's the perfect paper that always does the trick. The raw material for REY paper is exclusively and responsibly sourced from local forests. The paper mills are located close to their fibre sources, ensuring that both sourcing and production are as local as possible. After treatment, 93% of used water is returned to its river source. Code: 46003
